

PVC LAMINATED FOAM BOARD

PVC Laminated Foam Board

A light sandwich panel with a PVC foam core and overlays is known as PVC laminated foam board. It consists of PVC foam sheets mixed with other materials including HPL and PVC film.

Introduction

Bathroom cabinets, Kitchen cabinets, Wardrobes, Doors, and wall panels all employ PVC laminated foam board. Since it's a new kind of material for commercial ornamental improvement, we often utilize an aluminium bar to join the panels together. PVC wall panels are made from non-toxic, environmentally acceptable raw materials.

Advantages of PVC Laminated Foam

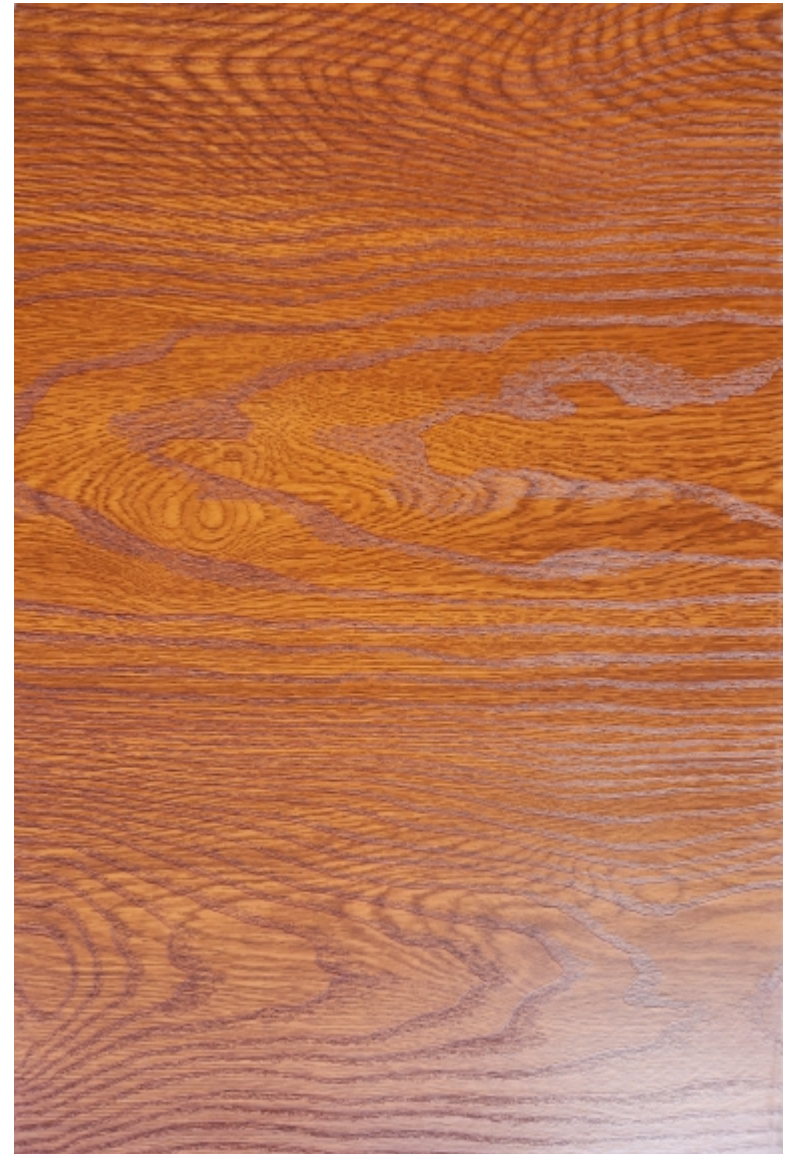

- Board
- Variety Design
- Easy to Install
- ECO friendly
- Waterproof
- Lightweight material
- Good fire performance
- Insect and pest resistant
- Moisture resistant
